SUMMARY

- **Front-End Developer:-** I'm a goal-oriented Front-End Developer with a focus on building efficient, user-centric web applications. I see coding as a powerful tool to automate and streamline processes, and I'm motivated by the challenge of transforming complex problems into clear, functional solutions. My recent projects, from a symbol board for students to a teleprompter for content creators, show my commitment to creating practical tools that improve everyday life. I'm skilled in **HTML, CSS, JavaScript, React, and TypeScript**, and I am always ready to apply my skills to projects that will help shape the future.

SKILL SUMMARY

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript
- **Frameworks & Libraries:** React, Bootstrap, Tailwind CSS
- **Tools & Platforms:** Git, GitHub, Visual Studio Code, Sublime Text, Figma, Photoshop, Adobe XD, Framer
- **Key Concepts:** Responsive Design, API Integration, JSON, User Interface (UI) Development

RECENT PROJECTS

Symbol Board

- **The Problem:** My classmates were frustrated by the constant hassle of searching for scientific symbols for their assignments.
- **My Solution:** I developed a web tool that lets users find and copy these symbols instantly. I focused on making it fast and efficient by using a **JSON file** and **JavaScript** for dynamic loading, which kept the experience smooth and quick.

Teleprompter

- **The Problem:** I realized that content creation was a real struggle when I had to manually scroll through scripts on my phone.
- **My Solution:** I built a web-based teleprompter that automates script scrolling. Users can now easily paste their scripts and set a custom speed, which completely eliminates a distracting manual step.

Weather App

- **The Problem:** I needed a project to hone my **API integration skills** and build something practical.

- **My Solution:** I created a web application that gives real-time weather conditions for any location in Nigeria. This project was a direct way for me to master working with external data and showcasing my ability to connect different systems.

HNG Blog Project

- **The Problem:** I needed a way to apply my fundamental skills and create a portfolio piece that showed my full range of development abilities.
- **My Solution:** I built a personal blog from the ground up, allowing me to practice and demonstrate core front-end skills like semantic **HTML**, clean **CSS**, and robust **website deployment**.

EDUCATION

Miva Open University
Bachelor of Sciences (Bsc)
Cyber Security

Lagos State, Nigeria
